

1. After receiving the product, please check whether the product accessories are complete and damaged. If yes, please take photos and contact after-sales service
2. Fix the expansion rubber plug at the installation position of the lamp, align with the hanging plate hole, and fix the hanging plate with self tapping screws. (Figure 1)
3. Lift the drive power line to connect with the household power line, and hide the remaining length of wire into the pipe. Then slightly loosen the screws on the wall lamp. Rotate the tube, adjust the appropriate position, align it with the external teeth of the hanging pan, and tighten it. (Figure 2)
4. According to your preference, rotate and adjust the lamp pole, and continue to lock the machine screw for fixation. (Figure 3)

Note: the product graphics in this manual are for reference only, and the real object shall prevail.
