

- 
- The diagram illustrates the assembly of a three-arm chandelier. The main structure consists of a central vertical stem (1) with three adjustable arms (2) extending from it. Each arm is equipped with a light bulb socket (3) and a switch (4). The arms are shown in a curved position, holding three light bulbs (5). A dashed line connects a callout box at the top to a detail of the stem's internal wiring, showing a cross-section of the stem with a central cable and a ground wire (6). Another dashed line connects a callout box at the bottom to a detail of the bulb socket assembly, showing the socket (3) and the bulb (5) being inserted. The diagram is numbered 1 through 8, corresponding to the parts list.
