

Skydro Ceiling Lamp installation method

1. Divide the hanging board and pose the picture

- 2.

Separate the screws for hanging lampshade and the ceiling screws for fixing the hanging plate by drilling holes, fix the ceiling according to the vacancy of the hanging plate marked above the figure, fix the ceiling first, and then connect the driving diagram to the main line of the ceiling

3. Find the largest lampshade, that is, the one with a small hole in the middle, fix the light source and the light source to the lampshade, and then connect the driving wire of the upper ceiling to the following picture, and hang the largest lampshade with the light source box to the ceiling.

4.

(Then install the remaining lampshades on the ceiling according to the drawing or the picture below)
